

Homework 4

Engr 133

Create a Solidworks model of the part shown below. Dimensions are shown.
Create the model so that the isometric orientation shows the part as shown below.
Also add a text feature on the front face as shown that indicates your first and last name.
The feature may be an extruded boss/base or an extruded cut (make the depth .020”).

SUBMISSION - show the instructor your model in class (upload screenshot MAY be an option- instructor will let you know)
